

HAOZHU WANG

1126 McIntyre St, Ann Arbor, MI

☎:617-380-9471 ✉:hzwang@umich.edu 🏠:www.haozhu-wang.com

SUMMARY

I develop machine learning algorithms to aid decision makings, most of which are inspired by engineering and healthcare applications. My past work involves causal inference, survival analysis, model explainability and credibility, model compression, and reinforcement learning. I'm currently developing inverse design algorithms for photonic devices and meta-learning algorithms for training deep models on small-sized datasets.

EDUCATION

University of Michigan Sep 2016 - Sep 2021(expected)
Ann Arbor, MI

- Ph.D. in Electrical and Computer Engineering (Machine Learning track). GPA: 3.94/4.00.

Nankai University and Tianjin University Sep 2011 - July 2015
Tianjin, China

- B.Eng in Optoelectronics. GPA: 3.92/4.00. Ranked 2nd out of 65.

Massachusetts Institute of Technology Jan 2015 - Jun 2015
Boston, MA

- Visiting student, EECS

PROFESSIONAL EXPERIENCE

Graduate student instructor Sep 2017 - Dec 2017
EECS 545 Machine Learning

- Designed homeworks and held weekly office hours
- Designed Python and Jupyter Notebook tutorial for over 100 graduate students

Graduate student instructor Jan 2020 - May 2020
EECS 504 Computer Vision

- Designed homeworks on signal procesing, scene recognition, and representation learning, etc.
- Held weekly office hours.
- Mentored students on final projects.

RESEARCH EXPERIENCE

Patient Risk Stratification with Individual Treatment Effect Sep 2018 - Sep 2019
University of Michigan *Professor Jenna Wiens*

- Proposed to model intermediate adverse event with multitask-learning and decomposition approaches.
- Compared the performance of the proposed methods and baseline methods on both synthetic and real datasets.
- Paper submitted to JAMIA.

Return to Work After Injury Jan 2018 - Dec 2020
University of Michigan *Professor Jenna Wiens*

- Cleaned and analyzed claim dataset with 1.25 million patient records.
- Trained deep learning models for predicting return to work.
- Trained treatment policies using Q-learning from observational data.
- Research abstract accepted by Machine Learning for Healthcare Conference.

Spatial and Temporal Invariance of Player Tracking Data

University of Michigan

Aug 2018 - Jan 2019

Professor Jenna Wiens

- Implemented convolutional neural networks, long short-term memory networks, and feedforward networks for predicting scores using player tracking data.
- Demonstrated a spatial invariance flipping the court does not affect the prediction accuracy.
- Demonstrated a temporal invariance that leveraging data longer than 0.5 second does not prediction accuracy.
- Our work provides insights for future work on player tracking data.

Deep Neural Network Compression

University of Michigan

Aug 2017 - Jan 2018

Professor Laura Balzano

- Implemented ordered weighted ℓ_1 (OWL) and group OWL (GrOWL) regularized deep neural networks in Tensorflow.
- Investigated sparsity inducing and correlation discovering properties of GrOWL for both convolutional layers and fully connected layers of deep neural network.
- Successfully compressed LeNet-5 and VGG-16 for more than 10 times. Paper published in ICLR 2018.

AWARDS

Rackham Conference Travel Grant Award, University of Michigan, 2018

Outstanding Graduate Award, Tianjin University, 2015

National Scholarship, Chinese Ministry of Education, 2014

Kitano Foundation of Lifelong Integrated Education Scholarship, Nankai University, 2013

Grand Prize of Physics Competition for College Students, Tianjin, 2013

First Tier Scholarship, Nankai University, 2012

Outstanding High School Students, Sichuan Provincial Department of Education, China, 2011

National First Prize in Applied Physics Competition for Middle School Students, Chinese Ministry of Education, 2008

REVIEW EXPERIENCE

Reviewer for: MLHC (Machine Learning for Healthcare) 2019, 2020

Subreviewer for: KDD 2018 2019, NeurIPS 2018

SKILLS

Programming Languages: Python, Matlab, C/C++, R, Julia, Java

Deep Learning Frameworks: Pytorch, Tensorflow, Keras

Others: Linux, Bash, SQL, Google Cloud Platform
